

LN₂ Back-up System

BS-II is to ensure optimal security for critical samples stored in ultra low temperature freezers. It controls injection of LN₂ into freezer when freezer temperature rises above the preset temperature value.

Advantage

- Compact design, small footprint, can be placed on freezer top
- Temperature display, setting temperature adjustable by user
- USA-made ASCO brand cryogenic electromagnetic valve

Safety

- Valve test button to check whether electromagnetic valve works normally
- High/Low temperature alarm, low battery alarm
- Stop injection of LN₂ when door opens, protecting user from being injured by LN₂ (need to be connected with ULT freezer door switch).

Reliability

- Stainless steel construction, rust-free, easy cleaning
- Hose & injection tube with sponge cover for insulation
- Rechargeable battery for 48 hours working time
